1. PRODUCT AND COMPANY IDENTIFICATION

Product Identifier: Maxxon® Commercial EZ Crete™
Trade Name: EZ Crete™
Recommended uses: Floor underlayment
Restrictions on uses: None identified
Supplier: Maxxon Corporation, 920 Hamel Road • PO Box 253 • Hamel, MN 55340
Company Telephone/Fax: (763) 478-9600 / (763) 478-2431
Emergency Telephone Number: (800) 424-9300 (CHEMTREC)

2. HAZARDS IDENTIFICATION

Emergency overview: Harmful if swallowed. Causes serious eye damage. Causes skin irritation. May cause an allergic skin reaction. Suspected of causing cancer. A natural chemical reaction during hardening (rehydration) develops sufficient heat that may cause severe burns in the event of contact with skin. These burns may possibly result in permanent injury. Do not allow product to harden around any body part or allow continuous, prolonged contact with skin. Crushing, mixing, sanding, or otherwise working with this product may generate large amounts of dust. Dust can be irritating to the eyes, skin, and respiratory system.

GHS Label Element

Hazard pictogram: 

Signal word: Danger
Physical Hazards: Not classified

Health Hazards

Acute toxicity, oral: Category 4
Skin corrosion/irritation: Category 2
Serious eye damage/eye irritation: Category 1
Sensitization, skin: Category 1
Carcinogenicity: Category 2

Environmental Hazards:

Hazardous to the aquatic environment, long-term hazard: Category 3

OSHA defined Hazards:

Not classified

Hazard statement:

Harmful if swallowed. Causes serious eye damage. Causes skin irritation. May cause an allergic skin reaction. Suspected of causing cancer. Harmful to aquatic life with long lasting effects.
2. HAZARDS IDENTIFICATION

Precautionary statement

Prevention: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Avoid breathing dust. Wash thoroughly after handling. Do not eat, drink, or smoke when using this product. Contaminated work clothing must not be allowed out of the workplace. Avoid release to the environment. Wear protective gloves. Wear eye/face protection. After mixing with water, do not allow prolonged contact with skin until the product has completely hardened and cooled.

Response: If swallowed: Rinse mouth. Call a poison center/doctor if you feel unwell. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse. If exposed or concerned: Get medical advice/attention. For specific treatment see Section 4 on the SDS.

Storage: Store locked up. Keep container tightly closed. Store away from strong acids, phosphorus, diazomethane, and aluminum (at high temperatures). Protect from moisture.

Disposal: Dispose of contents/container in accordance with applicable regulations.

Hazard(s) not otherwise classified (HNOC): Heat develops as product hardens. May cause serious burns during hardening (rehydration) resulting in possible permanent injury.

Supplemental information: None.

Composition comments: Gypsum (Calcium Sulfate), Portland cement, and fly ash contain naturally occurring Crystalline Silica (Quartz) which is listed as a lung carcinogen. This product also contains Titanium Dioxide, which is listed as a possible lung carcinogen. See Section 8 for exposure information.

4. FIRST AID MEASURES

**Inhalation:** Remove to fresh air. If symptoms persist, get medical attention.

**Skin Contact:** For skin contact, wash immediately with soap and water. If skin irritation or rash occurs: Get medical advice/attention. Take all contaminated clothing off immediately. Wash contaminated clothing before reuse.

**Eye Contact:** Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

**Ingestion:** Rinse mouth. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn’t get into the lungs. May result in obstruction and irritation if ingested. Get medical attention.
4. FIRST AID MEASURES

Most important symptoms/effects, acute and delayed: Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Skin contact during hardening (rehydration) may slowly develop sufficient heat that may cause severe burns possibly resulting in permanent injury. Do not allow product to harden around any body part or allow continuous, prolonged contact with skin. Handling can cause dry skin. May cause an allergic skin reaction, Dermatitis, rash. Indication of any immediate medical attention and special treatment needed: Provide general supportive measures and treat symptomatically. Keep victim warm. Keep victim under observation. Symptoms may be delayed.

General information: Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this Safety Data Sheet to the doctor in attendance. Wash contaminated clothing before reuse.

5. FIRE FIGHTING MEASURES

Extinguishing Media:

Suitable extinguishing media: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable extinguishing media: None known

Specific hazards arising from the product: During fire, gases hazardous to health may form.

Special protective equipment and precautions for fire-fighters: Self-contained breathing apparatus, and full protective clothing must be worn in case of fire.

Fire-fighting equipment/instructions: Firefighters should wear full protective clothing including self-contained breathing apparatus. Use water to spray cool unopened containers.

Specific Methods: Use standard firefighting procedures, and consider the hazards of other involved materials.

General fire hazards: No unusual fire or explosion hazards noted.
6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:

Keep people away from, and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid inhalation of dust. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fumes at levels exceeding the exposure limits. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. Use personal protection recommended in Section 8.

Methods and materials for containment and cleaning up:

Sweep up or gather material and place in appropriate container for disposal. If sweeping of a contaminated area is necessary, use a dust suppressant agent which does not react with the product. Contain the spill, then place in a suitable container. Minimize dust generation. For waste disposal, see Section 13 of the SDS. Prevent entry into waterways, sewer, basements or confined areas.

Environmental precautions:

Avoid release into the environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water. Keep out of drains, sewers, ditches, and waterways. If large quantities enter a waterway, advise local authorities.

7. HANDLING AND STORAGE

Precautions for safe handling:

Provide appropriate exhaust ventilation at places where dust is formed. Minimize dust generation and accumulation. Do not breathe dust. Do not get this material in contact with eyes. Avoid contact with eyes, skin and clothing. Avoid prolonged exposure. Do not taste or swallow. When using, do not eat, drink or smoke. Wear appropriate personal protective equipment. Avoid release to the environment. Do not empty into drains.

Conditions for safe storage, including any incompatibilities:

Keep the container tightly closed and dry. Store in a covered, dry, climate-controlled area, away from incompatibles. Keep away from food, drink and animal feeding stuffs.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Biological limit values: No biological exposure limits noted for the ingredient(s).

Exposure Guidelines:
Occupational exposure to nuisance dust (total and respirable) and respirable Crystalline Silica should be monitored and controlled. Exposure limits for CRystALLINE SILICA - the US OSHA exposure limits 8 hour TWA for CRystALLINE SILICA (QUARTZ) and is calculated from the following equations: 30/(%SiO2+2) mg/m³ for total dust; and 10/(%SiO2+2) mg/m³ for the respirable fraction. Exposure limits for Amorphous, including natural diatomaceous earth - the US OSHA exposure limits 8 hour TWA for Amorphous, including natural diatomaceous earth, and is calculated from the following equations: 80/(%SiO2) mg/m³.

*Testing conducted by Maxxon Corporation did not detect respirable Crystalline Silica during activities associated with the normal use of this product; however, jobsite air monitoring should be conducted to determine actual exposure when permissible exposure limits may be exceeded.

Appropriate engineering controls: When using product, provide local and general exhaust ventilation to keep airborne dust concentrations below exposure limits. Use wet methods, if appropriate, to reduce the generation of dust.

Individual protection measures, such as personal protective equipment

Eye/Face protection: Wear safety glasses with side shields (or goggles). Ensure compliance with OSHA’s PPE standard (29 CFR 1910.132 and .133) for eye and face protection. Safety shower/eye wash fountain must be readily available in the workplace area (29 CFR 1910.151(c)).

Skin protection

Hand protection: Wear appropriate chemical resistant gloves.

Other: Impervious protective clothing and gloves recommended to prevent drying or irritation of skin. Ensure compliance with OSHA’s PPE standards (29 CFR 1910.132 (general) and 138 (hand protection)). Safety shower/eye wash fountain is recommended in the workplace area (29 CFR 1910.151(c)).
8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Respiratory protection: A NIOSH approved dust mask or filtering face piece is recommended in poorly ventilated areas or when permissible exposure limits may be exceeded. Respirators should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA’s respirator standard (29 CFR 1910.134) and ANSI’s standard for respiratory protection (Z88.2).

Thermal hazards: Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations: Keep away from food and drink. Always observe good personal hygiene measures such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state: Powder
Form: Solid
Color: Grey
Odor: Odorless
Odor Threshold: Not Available
pH value: 10 - 12
Melting point/freezing point: 2816.62°F (1547.01°C) estimated
Boiling temperature/boiling range: 4613.79°F (2545.44°C) estimated
Flash point: Not Applicable
Evaporation rate: Not Available
Flammability (solid, gas): Not Available
  Flammability limit - lower %: Not Applicable
  Flammability limit - upper %: Not Applicable
Explosive limit - lower %: Not Applicable
  Explosive limit - upper %: Not Applicable
Vapor pressure: Not Applicable
Vapor density: Not Applicable
Relative density: 2.26 - 2.3 g/cm³ estimated
Solubility(ies), (water): Insoluble
Partition coefficient (n-octanol / water): Not Available
Auto Ignition Temperature (AIT): Not Available
Decomposition Temperature: Not Available
Viscosity: Not Available
Other information:
  Specific Gravity: 2.26 - 2.3
10. STABILITY AND REACTIVITY

Reactivity: Reacts with water (normal condition of use).
Chemical stability: Material is stable under normal conditions.
Possibility of hazardous reactions: No dangerous reaction known under conditions of normal use.
Conditions to avoid: Contact with incompatible materials. Avoid dispersal of dust in the air (i.e. clearing dust surfaces with compressed air). Exposure to moisture.
Hazardous decomposition products: May include, and are not limited to: Calcium Oxide, Sulfur Dioxide, Magnesium Oxide, Aluminum Oxide, and Sulfur Trioxide.

11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure
Inhalation: Prolonged inhalation may be harmful. Inhalation of dusts may cause respiratory irritation.
Skin contact: Causes skin irritation. May cause an allergic skin reaction. Skin contact during hardening (rehydration) may slowly develop sufficient heat that may cause severe burns possibly resulting in permanent injury. Do not allow product to harden around any body part or allow continuous prolonged contact with skin. Handling can cause dry skin.
Eye Contact: Causes serious eye damage. Dust in the eyes will cause irritation.
Ingestion: Harmful if swallowed.
Symptoms related to the physical, chemical and toxicological characteristics: Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin contact during hardening (rehydration) may slowly develop sufficient heat that may cause severe burns possibly resulting in permanent injury. Do not allow product to harden around any body part or allow continuous, prolonged contact with skin. Handling can cause dry skin. May cause an allergic skin reaction, Dermatitis, rash. Upper respiratory tract irritation.

Information on toxicological effects
Acute toxicity: Harmful if swallowed. May cause an allergic skin reaction. May cause respiratory irritation.

Estimates for product may be based on additional component data not shown.
11. TOXICOLOGICAL INFORMATION

Skin corrosion/irritation: Skin contact during hardening (rehydration) may slowly develop sufficient heat that may cause severe burns possibly resulting in permanent injury. Do not allow product to harden around any body part or allow continuous, prolonged contact with skin. Handling can cause dry skin.

Serious eye damage/eye irritation: Causes serious eye damage.

Respiratory or skin sensitization
Respiratory sensitization: Not classified
Skin sensitization: May cause an allergic skin reaction.
Germ cell mutagenicity: Not classified
Carcinogenicity: Suspected of causing cancer. Respirable Titanium Dioxide from occupational sources has been classified by IARC as a possible lung carcinogen to humans. Human studies do not suggest an associate between occupational exposure to Titanium Dioxide and an increased risk for cancer. Evidence showed that high concentrations caused respiratory tract cancer in rats exposed by inhalation and intratracheal instillation.

Exposure to respirable Crystalline Silica in the form of Quartz or Cristobalite from occupational sources is listed by IARC and NTP as a lung carcinogen. Prolonged exposure to a respirable Crystalline Silica has been known to cause Silicosis, a lung disease, which may be disabling. While there may be a factor of individual susceptibility to a given exposure to a respirable Silica dust, the risk of contracting Silicosis and the severity of the disease is clearly related to the amount of respirable Crystalline Silica exposure and the length of time (usually years) of exposure.

Sulfur Trioxide has not been classified for carcinogenic effects. However, IARC concluded that occupational exposure to strong inorganic mists containing Sulfuric Acid, formed from Sulfur Trioxide reacted with water, is carcinogenic to humans. The ACGIH has classified strong inorganic acid mist containing Sulfuric Acid as a suspected human carcinogen. Exposure to inorganic acid mist (Sulfuric Acid mist) in this product will not occur because inorganic acid is not generated under normal conditions of use of this material.

IARC Monographs, Overall Evaluation of Carcinogenicity

Crystalline Silica (Quartz)* (CAS 14808-60-7) 1 - Carcinogenic to humans
Iron Oxide (CAS 1309-37-1) 3 - Not classifiable as to carcinogenicity to humans
Silica, Amorphous (CAS 7631-86-9) 3 - Not classifiable as to carcinogenicity to humans
Titanium Dioxide (CAS 13463-67-7) 2B - Possibly carcinogenic to humans

11. TOXICOLOGICAL INFORMATION Continued

Reproductive toxicity: Not classified
Specific target organ toxicity - single exposure: Not classified
Specific target organ toxicity - repeated exposure: Not classified
Aspiration hazard: Not available
Chronic effects: Prolonged exposure may cause chronic effects.
Further information: *Testing conducted by Maxxon Corporation did not detect respirable Crystalline Silica during activities associated with the normal use of this product; however, jobsite air monitoring should be conducted to determine actual exposure when permissible exposure limits may be exceeded.

12. ECOLOGICAL INFORMATION

Ecotoxicity: Harmful to aquatic life with long lasting effects. Large quantities of this product may be harmful to aquatic life due to high pH.

*Estimates for product may be based on additional component data not shown.

Persistence and degradability: No data is available on the degradability of this product.
Bioaccumulative potential: No data is available.
Mobility in soil: No data is available.
Other adverse effects: No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
13. DISPOSAL CONSIDERATIONS

Disposal instructions: Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste.

Local disposal regulations: Dispose in accordance with all applicable regulations.

Hazardous waste code: The waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Waste from residues /unused products: Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging: Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. TRANSPORTATION INFORMATION

DOT: Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not applicable.

General Information: This product is not regulated as a hazardous material by the United States (DOT) transportation regulations.

15. REGULATORY INFORMATION

US Federal regulations

This product is a “Hazardous Chemical” as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

US State Regulations

US. Massachusetts RTK - Substance List
- Aluminum Oxide (CAS 1344-28-1)
- Calcium Oxide (CAS 1305-78-8)
- Calcium Sulfate, Dihydrate (CAS 10101-41-4)
- Crystalline Silica (Quartz)* (CAS 14808-60-7)
- Iron Oxide (CAS 1309-37-1)
- Magnesium Oxide (CAS 1309-48-4)
- Portland Cement (CAS 65997-15-1)
- Silica, Amorphous (CAS 7631-86-9)
- Sulfur Trioxide (CAS 7446-11-9)
- Titanium Dioxide (CAS 13463-67-7)
15. REGULATORY INFORMATION Continued

US State Regulations

US. New Jersey Worker and Community Right-to-Know Act
Aluminum Oxide (CAS 1344-28-1)
Calcium Oxide (CAS 1305-78-8)
Calcium Sulfate, Dihydrate (CAS 10101-41-4)
Crystalline Silica (Quartz)* (CAS 14808-60-7)
Iron Oxide (CAS 1309-37-1)
Magnesium Oxide (CAS 1309-48-4)
Portland Cement (CAS 65997-15-1)
Silica, Amorphous (CAS 7631-86-9)
Sulfur Trioxide (CAS 7446-11-9)
Titanium Dioxide (CAS 13463-67-7)

US. Pennsylvania Worker and Community Right-to-Know Act
Aluminum Oxide (CAS 1344-28-1)
Calcium Oxide (CAS 1305-78-8)
Calcium Sulfate, Dihydrate (CAS 10101-41-4)
Crystalline Silica (Quartz)* (CAS 14808-60-7)
Iron Oxide (CAS 1309-37-1)
Magnesium Oxide (CAS 1309-48-4)
Portland Cement (CAS 65997-15-1)
Silica, Amorphous (CAS 7631-86-9)

US. Pennsylvania Worker and Community Right-to-Know Act (Cont.)
Sulfur Trioxide (CAS 7446-11-9)
Titanium Dioxide (CAS 13463-67-7)

US. Rhode Island RTK
Aluminum Oxide (CAS 1344-28-1)
Sulfur Trioxide (CAS 7446-11-9)

California Proposition 65: WARNING: This product contains a chemical known to the State of California to cause cancer.

International Inventories

<table>
<thead>
<tr>
<th>COUNTRY(S) OR REGION</th>
<th>INVENTORY NAME</th>
<th>ON INVENTORY (YES/NO)*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Canada</td>
<td>Domestic Substances List (DSL)</td>
<td>Yes</td>
</tr>
<tr>

<td>Toxic Substances Control Act (TSCA) Inventory</td>
<td>Yes</td>
</tr>
</tbody>
</table>

*A "Yes" indicates that all components of this product comply with the inventory requirements administered by the governing country(s). A "No" indicates that one or more components of the product are not listed or exempt from listing on the inventory administered by the governing country(s).
16. OTHER INFORMATION

Procedure used to derive the classification:

<table>
<thead>
<tr>
<th>CLASSIFICATION</th>
<th>JUSTIFICATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACUTE TOXICITY (oral) - Category 4</td>
<td>Calculation method</td>
</tr>
<tr>
<td>SERIOUS EYE DAMAGE - Category 1</td>
<td>Calculation method</td>
</tr>
<tr>
<td>SKIN SENSITIZATION - Category 1</td>
<td>Calculation method</td>
</tr>
<tr>
<td>CARCINOGENICITY - Category 1A</td>
<td>Calculation method</td>
</tr>
<tr>
<td>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) (lungs) – Category 1</td>
<td>Calculation method</td>
</tr>
</tbody>
</table>

Key to abbreviations

- **ATE** = Acute Toxicity Estimate
- **BCF** = Bioconcentration Factor
- **GHS** = Globally Harmonized System of Classification and Labelling of Chemicals
- **IATA** = International Air Transport Association
- **IBC** = Intermediate Bulk Container
- **IMDG** = International Maritime Dangerous Goods
- **LogPow** = logarithm of the octanol/water partition coefficient
- **UN** = United Nations

Product List: Maxxon Commercial EZ Crete
Issue Date: December 2021
Version #: 01
Revision Date: December 2021
Prepared by: Maxxon Corporation

HMIS® ratings:
- Health: 3
- Flammability: 0
- Physical hazard: 1

NFPA ratings:
- Health: 3
- Flammability: 0
- Physical hazard: 1

0=Minimal, 1=Slight, 2=Moderate, 3=Serious, 4=Severe, *=Chronic

Disclaimer: This SDS is intended to quickly provide useful information to the user(s) of this material or product. It is not intended to serve as a comprehensive discussion of all possible risks or hazards, and it assumes a reasonable use of the product. The information contained in this SDS is believed to be accurate as the date of preparation of this SDS and has been compiled from sources believed to be reliable. It is offered for your consideration, investigation and verification. The user or handler (or their employer) should consider the specific conditions in which this material will be used, handled or stored and determine what specific safety or other precautions are required. Employers should ensure that their employees, agents, contractors and customers who will use the product receive adequate warnings and safe handling procedures, including a current SDS. Product users or handlers (or their employer) who are unsure of what specific precautions are required should consult their employer, product supplier, or safety or health professionals before handling or working with this product. Please notify us immediately if you believe this SDS or other safety and health information about this product is inaccurate or incomplete.
