1. PRODUCT AND COMPANY IDENTIFICATION

Product Identifier: Maxxon Commercial Isolate Part A
Recommended uses: Isolation primer
Restrictions on uses: None identified
Supplier: Maxxon Corporation, 920 Hamel Road • PO Box 253 • Hamel, MN 55340
Company Telephone/Fax: (763) 478-9600 / (763) 478-2431
Emergency Telephone Number: (800) 424-9300 (CHEMTREC)

2. HAZARDS IDENTIFICATION

GHS-US classification
- Skin corrosion/irritation: Category 2 H315 Causes skin irritation
- Skin sensitization: Category 1 H317 May cause skin allergic reaction
- Serious eye damage/eye irritation: Category 2A H319 Causes serious eye irritation
- Specific target organ toxicity (single exposure): H335 May cause respiratory irritation

Hazard pictograms (GHS-US)

Signal word (GHS-US) Warning

Hazard statements (GHS-US)
- H302 - Harmful if swallowed
- H315 - Causes skin irritation
- H317 - May cause an allergic skin reaction
- H319 - Causes serious eye irritation
- H335 – May cause respiratory irritation

Precautionary statements (GHS-US)
- P261 - Avoid breathing vapours, fume, mist, spray
- P264 - Wash hands, forearms and face thoroughly after handling
- P270 - Do not eat, drink or smoke when using this product
- P280 - Wear eye protection, protective clothing, protective gloves

Other hazards which do not result in classification: No additional information available
Unknown acute toxicity: Not applicable
3. COMPOSITION/INFORMATION ON INGREDIENTS

Substances: Not applicable

4. FIRST AID MEASURES

First-aid measures general: Get medical advice/attention if you feel unwell.
First-aid measures after inhalation: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical advice/attention.
First-aid measures after skin contact: Gently wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention.
First-aid measures after eye contact: Immediately rinse with water for a prolonged period while holding the eyelids wide open. Get medical advice/attention.
First-aid measures after ingestion: Immediately call a POISON CENTER or doctor/physician.
Most important symptoms and effects (acute and delayed): No additional information available
Immediate medical attention and special treatment, if necessary: No additional information available

5. FIRE FIGHTING MEASURES

Suitable (and unsuitable) extinguishing media
Suitable extinguishing media: Carbon dioxide (CO2), dry chemical powder, foam.
Specific hazards arising from the chemical
Combustion Product: In case of fire, toxic fumes might be formed
Fire-fighting hazard: May cause fire
Special protective equipment and precautions for fire-fighters
Firefighting instructions: Exercise caution when fighting any chemical fire.
Protection during firefighting: Do not enter fire area without proper protective equipment, including respiratory protection.
6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment, and emergency procedures

General measures: Prevent from entering sewers, basements and workpits, or any place where its accumulation can be dangerous. Ventilate area. Stop leak if safe to do so. All disposal methods must follow applicable local regulations.

For non-emergency personnel

Protective equipment: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walkthrough spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders

Protective equipment: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in “For non-emergency personnel”.

Emergency procedures: Stop leak if safe to do so. Evacuate unnecessary personnel. Prevent from entering sewers, basements and work pits, or any place where its accumulation can be dangerous. Ventilate area. Cover spill with noncombustible material, e.g.: sand/earth.

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and material for containment and cleaning up: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Reference to other sections: No additional information available.

7. HANDLING AND STORAGE

Precautions for safe handling: Keep in cool, well-ventilated area with container tightly closed.

Conditions for safe storage, including any incompatibilities

Technical measures: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Storage area: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10 of SDS) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.
8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

Epoxy resins, liquids
(25068-38-6): Not applicable

Benzyl Alcohol, liquids
(100-51-6):

Appropriate engineering controls:

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Environmental exposure controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures/Personal protective equipment

Personal protective equipment:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Hand protection:

Chemical-resistant, impervious gloves complying with an approved standard should always be worn when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates more protection: chemical splash goggles.

Skin and body protection:

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection:

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance

- Physical state: Liquid
- Color: Light Yellow
- Odor: Slight - There may be no odor warning properties, odor is subjective and inadequate to warn of overexposure.

- Odor threshold: Not available
- pH: 6-8
- Melting point: No data available
- Freezing point: 0 °C
- Boiling point: 260 °C
- Flash point: No data available
- Evaporation rate: No data available
- Relative evaporation rate (butylacetate=1): No data available
- Flammability (solid, gas): No data available
- Vapor pressure: No data available
- Relative vapour density at 20 °C: No data available
- Relative density: No data available
- Density: 1.17
- Solubility: Negligible
- Log Pow: No data available
- Auto-ignition temperature: No data available
- Decomposition temperature: No data available
- Viscosity, kinematic: 275-350 cps
- Viscosity, dynamic: No data available
- Explosive limits: No data available
- Explosive properties: No data available
- Oxidising properties: No data available
- Other information: No additional information available

10. STABILITY AND REACTIVITY

- Reactivity: Stable at normal temperature and pressure
- Chemical stability: Stable at normal temperature and pressure
- Possibility of hazardous reactions: Under normal conditions of storage and use, hazardous reactions will not occur
- Conditions to avoid: Extremes of temperature and direct sunlight
10. STABILITY AND REACTIVITY  Continued

Incompatible materials: Extremes of temperature and direct sunlight
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

11. TOXICOLOGICAL INFORMATION

Acute toxicity
Oral: Harmful if swallowed.

**Other adverse effects**

Effect on the global warming: No known effects from this product.

GWPmix comment: No known effects from this product.
13. DISPOSAL CONSIDERATIONS

Disposal methods
Regional legislation (waste): Disposal must be done according to official regulations.
Product/Packaging disposal recommendations: Avoid release to the environment. Disposal must be done according to official regulations.

14. TRANSPORTATION INFORMATION

Department of Transportation (DOT)
In accordance with DOT: Not regulated

Transportation of Dangerous Goods
Transport document description (IMDG): UN 3082 Environmentally hazardous substance, liquid, n.o.s. (Liquid Epoxy Resin), 9, III
UN-No. (IMDG): 3082
Proper Shipping Name (IMDG): Environmentally hazardous substance, liquid, n.o.s.
Class (IMDG): 9 - Miscellaneous dangerous substances and articles
Packing group (IMDG): III - Substances presenting low danger
Limited quantities (IMDG): 5 L
Marine pollutant: Yes

Air transport
Transport document description (IATA): UN 3082 Environmentally hazardous substance, liquid, n.o.s. (Liquid Epoxy Resin), 9, III
UN-No. (IATA): 3082
Proper Shipping Name (IATA): Environmentally hazardous substance, liquid, n.o.s.
Class (IATA): 9 - Miscellaneous Dangerous Goods
Packing group (IATA): III - Substances presenting low danger

15. REGULATORY INFORMATION

U.S. Federal regulations
Maxxon Commercial Isolate - Part A:
EPA TSCA Regulatory Flag: All components of this product are listed on the TSCA Inventory of Chemical Substances or are exempt from listing.
SARA Section 311/312 Hazard Classes: Immediate (acute) health hazard
15. REGULATORY INFORMATION  Continued

**EPOXY RESINS, LIQUIDS (25068-38-6)**

| Listed on the United States TSCA (Toxic Substances Control Act) inventory Not subject to reporting requirements of the United States SARA Section 313 |
| SARA Section 311/312 Hazard Classes | Immediate (acute) health hazard |

**International regulations**

**CANADA**

**WHMIS:**
Class D-2B Material causing other toxic effects. Components of this product are listed or exempt

**EU-Regulations:**
No additional information available. Components of this product are listed or exempt

**National regulations**

Maxxon Commercial Isolate - Part A
Components of this product are listed or exempt from listing on the Canadian Domestic Substance List.

**US State regulations**

Maxxon Commercial Isolate - Part A
This product contains less than 0.1% chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.

16. OTHER INFORMATION

**Full text of H-statements:**

- **H302:** Harmful if swallowed
- **H315:** Causes skin irritation
- **H317:** May cause an allergic skin reaction
- **H319:** Causes serious eye irritation
- **H335:** Causes respiratory irritation

**NFPA health hazard:**
2 - Materials that, under emergency conditions, can cause temporary incapacitation or residual injury.

**NFPA fire hazard:**
1 - Materials that must be preheated before ignition can occur.

**NFPA reactivity:**
0 - Material that in themselves are normally stable, even under fire conditions.

**Health Hazard rating:**
2 Moderate Hazard - Temporary or minor injury may occur

**Flammability:**
1 Slight Hazard - Materials that must be preheated before ignition will occur. Includes liquids, solids and semi solids having a flash point above 200 F. (Class IIIB)

**Physical:**
0 Minimal Hazard - Materials that are normally stable, even under fire conditions, and will NOT react with water, polymerize, decompose, condense, or self-react. Non-Explosives.
