

MAXXON®

PROVEN PRIMING SOLUTIONS

BOOST BOND STRENGTH WITH MAXXON'S LOW ODOR, LOW VOC, HIGH PERFORMANCE PRIMERS.

Improper priming can compromise the entire floor system. Whether it's priming before leveling, or preparing for finished floor goods, choosing the right primer is important. That's why **Maxxon** offers a range of primer solutions tailored

to address the challenges of different substrates. With **Maxxon's** innovative and cost-effective formulas, we have the right primer for any project, ensuring your floors have the strong bond they need for long-lasting performance.

CHOOSING THE RIGHT PRIMER.

PRIMES & SEALS

MAXXON[®] COMMERCIAL **Multi-Use Acrylic**

Maxxon[®] Commercial Multi-Use Acrylic Primer.

This versatile, high-solids liquid polymer enhances the bond strength of Maxxon underlayments. Maxxon Commercial Multi-Use Acrylic Primer achieves optimal penetration over most substrates and can be used to seal underlayments prior to finished flooring installation.

IMPROVES ADHESIVE BOND

MAXXON[®] COMMERCIAL **Gypsum Overspray**

Maxxon[®] Commercial Gypsum Overspray is designed to optimize adhesive bond strength and performance for glue-down finished flooring. Applied before final flooring installation, this primer effectively reduces underlayment porosity, helping to maintain the correct adhesive open time for a seamless, durable finish.

RESTORES OLD GYPSUM

MAXXON[®] COMMERCIAL **Fortify**[™]

Restore instead of replace old and damaged gypsum underlayments with Maxxon[®] Commercial Fortify[™], a high-performance, single-component acrylic primer. Save time and money by readying the surface, rather than replacing compromised underlayments.
